*original art by Belinda Paton*

**TWO WORLDS**  
WISDOM SCHOOL

## Origin of the 108 Wisdom Principles

The 108 Wisdom Principles have their origin in the perennial wisdom—the collective wisdom of humankind since the beginning of life. This wisdom has come down through the ages in various religions, traditions, and schools of philosophy.

The perennial wisdom studies what is. It seeks to understand the structure and operation of the cosmos. It is interested in discovering and applying spiritual laws and principles in our material dimension.

Some of the 108 Wisdom Principles are stated as laws—if A then B—and some are stated as principles of relationship. Both contribute to a better understanding of That Which Is.

Mastering the 108 wisdom principles helps you master your destiny. By working with the universe rather than against it, you can manifest your intentions, create your preferred reality, and invent your future.

Nobody owns the 108 Wisdom Principles we have distilled for the Two Worlds Wisdom School—they belong to all of us and none of us. Because of this, we retain our right to use them and freely share them via a Creative Commons Deed.

*original art created by Belinda Paton for the  
Theater of Generosity Innovation Circle*

The Theater of Generosity Innovation Circle is made up of a group of health systems exploring potentials in generosity. One of these potentials is to create a generous experience for patients and families. A patient entering the hospital or clinic will see generosity portrayed in art, hear about generosity in their conversations with caregivers, and receive generosity through a generosity menu.

Another potential is to approach generosity as a therapeutic modality and invite patients to heal differently by giving as well as receiving. Stories of patients who learn to give and receive in new ways are featured in generosity bedtime stories.

Beyond this, the Innovation Circle is exploring how generosity can shape relationships among providers and even create new economic realities of abundance for the organization.

The Theater of Generosity Innovation Circle incorporates the wisdom principles of abundance, giving and receiving, sharing, happiness, and gratitude.

# The 108 in Action: University Graduate Course

*learning skills for transformation*

Graduate students enrolled in the Executive MBA Program in Health Administration at the University of Colorado are learning the 108 wisdom principles as part of an elective course, *Transformational Leadership and the Metaphysics of Management*. The course is taught by Leland R. Kaiser, Ph.D., a nationally-known futurist and general systems theorist. The emphasis of the course is on transforming healthcare organizations, not just changing them.

The Law of Dynamic Balance is a good example of one of the 108 wisdom principles important for a transformational leader to understand. The law states that every aspect of a working system must be in dynamic balance with every other aspect. This means the leader, when considering a proposed action, must take more into account than the action's intended effect on his or her organization. The leader must understand the total system of which the organization is a part and must understand the manifold reverberations the proposed action will have throughout the entire system, including any previously-unanticipated consequences.

# The 108 in Action: The Alembic

*original art for the Alembic created by Belinda Paton*

The Alembic is a program designed to help talented leaders move into their highest potential.

Every organization has individuals who excel at everything they do—and enrich every environment they enter. But individuals with extraordinary potential are usually given only ordinary development opportunities. The Alembic is an exceptional space for people to unfold innate abilities and learn unusual skills. It was established by a circle of 18 founding CEOs.

The name alembic comes from the ancient art of alchemy. An alembic was used to refine and purify elements. It was a container in which one thing could become something else.
